Technical Skills

Skills Profile

- Familiar with Adobe Photoshop and Illustrator. Understands core concepts like difference between vector and raster images, layers, and SVG.
- Knowable in HTML5 and CSS3. Can build, setup, and maintain basic websites. Has some knowledge in front-end web development such as learning about typography, user experience, user interface, and modern design trends such as minimalism.
- Strong online present. I have accounts with Github, Facebook, Google+, Twitter, Reddit, and other outlets to let users be familiar with brands.
- Conversant in Search Engine Optimization and advertising.

Github Account: <https://github.com/Legym/Basic-Web-Skills>

I just recently started to upload work to it for demonstration purposes. Just want to be able to display basic web skills.

Employment

Wal-Mart Albemarle, NC, (March 2011 to June 2013)

Positions: Sales associates, Electronics, Garden Center

- Assisted garden center in moving patio furniture, pallets of soil, and adjust steel beams.
- Helped customers in electronics by setting up phones, creating service contracts, and answering phone calls related to products in Garden Center or technical questions in electronics.
- People friendly and easy to work with. Attained Employee of the Month and nominated two more times the following year.
- Responsible for closing one or the other departments. Counted the cash register, locked the security cage or doors, swept and clean, and left the department cleaned and organized.

Sterilelink, NC, (June 2013 to January 2014)

Positions: Service Technician, Electrician.

- Strong verbal communication. Maintain conversations with surgeons/doctors while performing the task at hand.
- Maintained service vehicle by modularizing parts; Kept vehicle clean and well organized.
- Performed tedious undertakings and able to work under pressure.
- Repaired circuit boards on hospital equipment by reading the volts, amps, and checking CPU.
